## About the Score

Bureau scores use available Veda bureau data to calculate a risk estimate. The primary purpose of this score is to predict the likelihood of a future adverse event being recorded on the company's Veda bureau file or that the company will go into receivership or external administration in the next 12 months. This bureau score incorporates information available on the company's Veda bureau file as well as information available on the Veda bureau files of the company directors, whose bureau files forms part of this report.

<sup>1</sup>Probability of Adverse - is the probability expressed as a percentage that an adverse event (e.g. an external administration, petition to wind up, court judgement, court writ, payment default, or mercantile enquiry) will be lodged on the Veda bureau file of the company within the next 12 months.

<sup>2</sup>Probability of Failure - is the probability expressed as a percentage that a serious adverse event (e.g. an external administration, petition to wind up) will be lodged on the Veda bureau file of the company within the next 12 months.

<sup>3</sup>Key contributing factors - are the factors that contribute most in either a positive or a negative way to the overall score.
